Defending will be more cost effective but much tougher! Defend with anti-materiel systems unless you're in a hurry to finish the game, you'll reap the rewards later. How to Attack: Do everything you can to deal damage and kill your enemies, but don't linger too long, it'll cost a lot of units to kill a single unit. Choose an appropriate base to position and an optimal target to hit. How to Evade: While it may be tempting to use an anti-materiel weapon to destroy your opponent, it's in your best interest to instead sneak past and strike from the blind side. It's much easier to shoot your opponent with your standard weapon, but you can use your anti-materiel system to destroy the anti-materiel system! How to Reload: Quickdrawing an anti-materiel weapon for 3 seconds means that you'll have 3 seconds to reload before the anti-materiel system
